

A new cover on non-PHARMAC drugs

GIVE YOUR EMPLOYEES ACCESS TO LIFE-SAVING TREATMENT.

non-PHARMAC funded drugs can be lifesaving - but can cost up to hundreds of thousands of dollars. This is out of reach for many people so we're introducing new cover: **nib's non-PHARMAC Plus option.**

WHAT IS NON-PHARMAC PLUS?

non-PHARMAC Plus is an add-on to any new or existing business base cover policies. It covers the cost of drugs that are approved by Medsafe, but are not on PHARMAC's Pharmaceutical Schedule, for treating cancer and other types of health conditions, in hospital or at home.¹

You can now add non-PHARMAC cover for your employees' existing policies. Where the option is subsidised, we'll cover pre-existing conditions to give your employees additional peace of mind.

BENEFIT LIMITS

Benefit limits are flexible, with members able to choose from the following levels of cover to suit their budget:

- \$20,000
- \$50,000
- \$100,000
- \$200,000
- \$300,000

WHY IT'S A GREAT ADD-ON

With this add-on, your employees could have access to these life-changing treatments without a huge financial burden. Plus, when members select the \$300,000 benefit limit, they will have one of the highest non-PHARMAC drug limits in the market.²

HOW THIS WORKS ALONGSIDE OUR CANCER CARE PROGRAMME

This add-on covers many non-PHARMAC drugs, not just cancer treatment. However, if an employee is diagnosed with cancer then our Cancer Care programme provides a dedicated coach to support members and their carers through chemotherapy or radiotherapy. This is just one of our health management programmes that support our members' better health.

Get in touch to get non-PHARMAC Plus cover for your business or to find out more go to: health.nib.co.nz/business | 0800 287 642 | grouphealth@nib.co.nz

¹ Policy terms conditions and exclusions apply.

² If \$300,000 option is taken with Premier Health Business.
